Leica Geosystems
Release Notes

Product   **Leica JetStream Viewer 1.2**

Date   April 18, 2016

From   Bill Wallace, Senior TLS Software Product Manager

Contents

What's New

Background Panoramic Image Support

JetStream Viewer now supports displaying background panoramic imagery.

In order to display background panoramic imagery in JetStream Viewer, users are required to have JetStream 1.2 or higher to be able to read/store the panoramic image data in ProjectVault, and Cyclone 9.1.4 or higher is required to publish the panoramic image data to JetStream.

New CLM 1.5

JetStream now supports Leica Client License Manager (CLM) 1.5, which offers greater stability.

Leica JetStream Viewer Compatibility and Upgrades

Windows 10 Support

JetStream Viewer now supports the Windows 10 operating system.

Licensing JetStream Viewer

JetStream Viewer 1.2 will connect to JetStream ProjectVault to determine how many connectors are available. Ten (10) instances of JetStream Viewer can run concurrently for every one (1) connector, and will not consume the connector.

For Example – If JetStream has two (2) Connector licenses, it will allow 20 viewers AND two (2) CloudWorx users to connect concurrently.

Compatibility with JetStream Viewer 1.2 and JetStream ProjectVault

JetStream Viewer 1.2 is compatible with JetStream ProjectVault 1.2 and newer.
