Windows 10 Support.....	2
Compatibility	2

What's New

Background Panoramic Image Support

JetStream ProjectVault now supports storing background panoramic imagery published from Cyclone. The background imagery can be visualized in JetStream Viewer and CloudWorx's TruSpace viewer when working with JetStream data.

New CLM 1.5

JetStream now supports Leica Client License Manager (CLM) 1.5, which offers greater stability.

Leica JetStream Compatibility and Upgrades

Windows 10 Support

JetStream now supports the Windows 10 operating system.

Compatibility

JetStream requires corresponding releases of Cyclone, CloudWorx, and JetStream Viewer for features to function correctly:

1. Cyclone 9.1.4 or higher is required to publish background panoramic image data to JetStream ProjectVault.
2. JetStream Viewer 1.2 or higher is required to be able to read/display the background panoramic imagery in JetStream Viewer
3. CloudWorx 6.1 or higher for AutoCAD, CloudWorx 5.1 or higher for MicroStation, CloudWorx 2.0.1 or higher for PDMS, or CloudWorx 1.0.2 or higher for Navisworks are required to be able to read/display the background panoramic imagery in the CloudWorx TruSpace viewer.
